Background

A core policy of this government is to ensure that senior citizens, who rely on state assistance due to the absence of family support care can spend their remaining years in dignity, happiness and comfort. In line with this commitment, the Ministry of Social and Family Development seeks for a private investor to Design, Build, Finance, and Operate the Elderly Home in Addu City, Feydhoo under a Public Private Partnership (PPP) Model.

The Elderly Home aims in providing residential home facilities, aged day care and nursing care home facilities respectively for both male and females separately. Residential Home (both female and male wards) enables voluntary registration whereas nursing care home provides registration for bedridden elderly by their family members.

The main objective is to provide the highest quality of care, ensuring a comfortable and supportive environment where individuality, dignity and quality of life are paramount to the residents. The home would provide residential, aged day care and nursing care facility under one umbrella which would enhance individual quality of life, providing unique personcentered care plan. The facility would also aim to promote independence and a well-balanced nutritional diet meeting individual requirements with activities, sessions, entertainment and trips.

Specific Objectives

- Provide an enabling environment to residents in relation to vulnerability as age
 determines. In this respect the design of the elderly village should meet the
 requirements of a recognized accredited quality standard.
- To deliver a service of the highest quality that will improve and sustain the service user's overall quality of life. In this respect the care service is designed to meet the requirements of a recognized accredited quality standard, but in a people centered approach.
- To ensure the services is delivered in a flexible, attentive manner, and in a non-discriminatory way while respecting each service user's right to independence, privacy, dignity, fulfilment, and the rights to make informed choices and to take risks.

To ensure that services are delivered in accordance with agreed consent and contracts of care with the individual/ guardian.

• To ensure that all services are delivered by trained staff with the Guidance of Best Practice information.

To ensure decisions made by individuals/ guardian prior to admission, and ongoing services is in relation to a legal framework regarding welfare and financial

security.

• Evaluate and improve the quality of overall facilities and services of the elderly village by orienting all staff who are working on the importance of holistic care

and rehabilitation.

To facilitate individuals to participate in the review process.

Infrastructure

This home will cater for around 150 to 200 senior citizens at a time. The Elderly Home should encompass universal accessibility standards and would consist of 3 categories of residents:

1. Residential: Vulnerable Elderly People under state care

2. Residential: Paid Residential Care (Private Residents)

3. Day Care Users

Modality

The proposed model for the development and operation of the Elderly Home is under a Public-Private Partnership (PPP) model, whereby the private partner will play a vital role in the

development, running and operation of the Home.

Public Private Partnership Model

Under the Public-Private Partnership (PPP) model, the private partner/investor (an industry representative) may use their name/business name in running of its operations. Investor may propose to build commercial areas and conduct business activities in the land area allocated for revenue generation.

The role of the government under the PPP model will be:

• Provision of land ready for construction with utility service connection

To set operational and quality minimum standards and ensure regular inspection and monitoring of facilities and services.

The government will provide a monthly fee ranging from MVR 5,000 to MVR 10,000 for each elderly resident under state care.

Location

The government will provide land/facility for long term use under the PPP model. A land area of 30,000 square feet has been allocated for the project in S.Feydhoo, Addu City.

Proposed Agreement Period

The length of the concession period for the operation and maintenance of the facility is 25 years, with an option to extend up to 50 years.

Benefits / Revenue Streams

- No rental fees will be charged from the private party for the acquired land plot.
- Under the PPP model, the private partner (an industry representative) may utilize the land area for other revenue generating options (examples Ayurveda Medical Clinics or Wellness Centre) if it does not affect the primary goals of the facility and shall be approved by the Ministry of Social and Family Development.
- A sum of MVR 5,000 to MVR 10,000 per month, provided by the government for each of the residents referred to through the government.
- Private parties may propose their own terms as they deem fit in with the development and operations of the Elderly Home if the primary requirements are met. Such terms shall be agreed upon with the Ministry of Social and Family Development at the agreement stage.

Social Benefits

The Elderly Home is expected to provide opportunities for a person-centered environment with the highest quality of care, ensuring a comfortable and supportive environment where individuality, dignity and quality of life are paramount to the residents.

- Independence: Creating a physical environment which supports and encourages an independent and self-enhancing lifestyle.
- Social & Lifestyle: Providing an enabling environment which caters to each individuals' social needs and lifestyle choices.
- Connectedness and linkages: Creating linkages to various other sources of social interactions on and off site.
- Diversity: Create an environment where different views and beliefs are encouraged.

- Sustainability: Create a physical environment that supports the internal functions and the residents to be socially, ecologically, and financially feasible for a long term
- Enabling and evolving: Provide an enabling environment which can cater to the needs of the individuals.
- Affordability: Provide an affordable and reasonable service.

Additionally, new job opportunities will be created on the island, which in turn bring in more revenue, thus enriching the livelihood of people. This is further expected to benefit the established businesses directly and indirectly within the island.

Scope of Work

- This initiative aims to address the growing demand for high-quality, accessible, and sustainable care facilities for the aging population in the Maldives. The project will provide a dedicated space for senior citizens to live with dignity, receive appropriate care, and enjoy a supportive community environment.
- The selected partner will be responsible for designing, constructing, financing, and operating the facility in accordance with the specifications and guidelines outlined in this Request for Proposal (RFP). The partnership seeks to leverage private sector expertise and innovation to deliver a facility that meets international standards while aligning with the Maldives' social and cultural context.
- The government will establish the project requirements including operational and quality standards.
- Medical services shall be developed to provide integrated healthcare services that address the mental and physical health needs of the elderly by trained professionals, such as occupational therapists, social workers, and nurses.
- The resident area shall be developed in a homelike scale, and in a manner comprising small group living spaces with natural light and views of the outdoors. Residents should have access to outdoor spaces, gardens, and walking paths. The design of the building should consider free movement of senior citizens using wheelchairs, and other mobility tools.
- Geriatric care includes facilities for the residents who need personalized care. (Physical health + Mental health + Therapy and rehabilitation)
- Housekeeping service to clean the residential areas, including storage and laundry facilities provided for residents on a sharing basis.

- Safety and security to be ensured, with properly trained and skilled security personnel deployed at required locations and installation of CCTV cameras including regular monitoring of the CCTV footage.
- Dietary staff should provide a balanced menu with 3 meals per day to satisfy the individual residents' dietary needs, plus additional nourishment and snacks.
- Shared kitchen for residents to cook, wash and clean if needed, with a shared dining area that can accommodate all residents.
- Outdoor and Indoor recreation areas provided for age-appropriate recreational activities and entertainment such as a garden area with seating, library and a multipurpose hall.
- Minimum Human resource requirements as stated by the government.
- Regular programs should be carried out to enhance social cohesion, teamwork and fitness among the residents.

Mandatory Spatial Requirements

Roles and Responsibility for the project

#	Activity	Details Details		
Re	Reception / Lobby / Corridors			
1	Main Counter / Registration / Lobby	Adequate space to cater to the needs of the visitors as well as the admin staff.		
2	Visitors' area	Sufficient space to have family meetings and gatherings where the patients can spend some time with their family members.		
3	Drive through area / Parking area	The drive through area should have adequate space to have direct access to the reception and the entrance of the building. Should have sufficient parking areas for the staff as well as the visitors.		
4	Common area	Sufficient space for the patients and staff to move freely and to accommodate everyone, especially wheelchair user. Plants may be kept on the sides of the corridors to act as guiders as and where applicable.		
Ac	lministrative Services			
1	Admin area/ Meeting room/ Server	Adequate area to carry out all the admin related work and to keep the machineries and furniture. Server room with sufficient space.		
Ac	Accommodation			
1	Permanent Residents (State care)	Adequate space for at least 50 residents. Spacious sharing basis rooms, maximum 4 beds in one room. Shared washroom and bathroom (2 water closets 2 wash basin 1 bath) for every room with universal access.		
2	Private residents	Spacious rooms with single or couple sharing basis. A toilet in every room with universal access		

Area to cater 50 people at once.	3	Day Care	Spacious rooms and toilets with sharing basis. Separate toilets for Female and Male Day care clients, with universal access Day rooms and toilets for private day care basis. Should include universal access
Common room/ Library Can include an indoor cafeteria. Library can be used to have discussions and programs. Adequate space for residents to do gardening as a leisure activity. Should be accessible at all times. Adequate space to play outdoor games, programs and activities for the residents. Area to carry out routine physical exercises for the residents. Should have space that can be used for organizing gettogether, Yoga classes, recreational activities, religious talks etc. Should have facilities for indoor games, TV, musical instruments, and digital screen. Clinical Area 1 Consultation Room Consultation room for general consultations. Space to accommodate two patients and an attendant at the medical room. Can also include a separate ward. A physiotherapy center can be established at the elderly home where older persons with musculoskeletal diseases such as back pain, arthritis and other age-related mobility challenges are treated. Nurse Station Nurse Station with sufficient space for the staff. Treatment Room Space to carry out basic medical procedure. Kitchen / Dining Uning Hall Sufficient space to cater 200 people at once. The dining table height should be such as to allow arms of the wheelchair to go under the table. The kitchen should be close to the dining area but not very close to bedrooms. The smoke, pungent cooking smell and noise from the kitchen may cause irritation to the residents. Adequate area to cook meals for 200 residents. Adequate area to cook meals for 200 residents. Storage area to keep stock for 2 months. Laundry and waste management	Re	ecreation Space/ Open Area

Eligible Criteria

- Strong track record in development of similar projects (design, build, finance, and operate).
- key personnel with technical experience in developing projects of similar scale.
- Technical abilities to meet the construction and operational requirement.
- International and Regional experience in participating in similar projects.
- Demonstrated ability to raise finance for similar projects.
- Sound financial position.
- Financial Position: Financial stability and capacity to sustain operations effectively

Submission Requirements

The bids submitted shall consist of the following (in the following order):

- 1. Name, title address and telephone number of the Investor or Principal who will serve as the Lead
- 2. Member for this project.
- 3. Company Profile/s: Details of the individual firm, company or consortium, including company profile, expertise and resource capacity.
- 4. Documents confirming the eligibility of the Bidder.
- 5. Copies of Annual Audited Financial Accounts of the applicant for the latest three financial years (stamped by the Company).
- 6. Copy of Business Registration Certificate (Valid) or Copy National ID Card (Lead Member).
- 7. Copy of GST Registration if applicable
- 8. Team members Information (Form 5)
- 9. Curriculum Vitae (CV) of the Team (Form 6)
- 10. Educational Certificates of the Team
- 11. Brief background and profiles of similar projects previously undertaken including the contract value.
- 12. Additional detailed information the applicant desires to submit to emphasize the strength on investing and delivering the project.

FORM 3: DESCRIPTION OF APPROACH, METHODOLOGY AND WORK PLAN FOR PERFORMING THE ASSIGNMENT

[Technical approach, methodology and work plan are key components of the Proposal. You are suggested to present your Proposal (5-10 pages, inclusive of charts and diagrams) divided into the following two chapters:

- a) Technical Approach and Methodology,
- b) Work Plan, and
- a) Technical Approach and Methodology. In this chapter you should explain your understanding of the objectives of the assignment, approach to the services, methodology for carrying out the activities and obtaining the expected output, and the degree of detail of such output. You should highlight the problems being addressed and their importance, and explain the technical approach you would adopt to address them. You should also explain the methodologies you propose to adopt and highlight the compatibility of those methodologies with the proposed approach.
- b) Work Plan. In this chapter you should propose the main activities of the assignment, their content and duration, phasing and interrelations, milestones (including interim approvals by the Client), and delivery dates of the reports. The proposed work plan should be consistent with the technical approach and methodology, showing understanding of the TOR and ability to translate them into a feasible working plan.
